

Synapttek

THOUGHTS

Newsletter Issue No. 16

July 2017

A Single Word

In today's sound byte world, we get our news through tweets and posts. Complex thoughts are often distilled to the core. Recently, I was asked to describe Synapttek in just one word. I wasn't even given 140 characters! It took a second, but quickly a word bubbled to the top - "*vibrant*".

I believe the word *vibrant* captures the preparation, successes and most of all, the energy, fueling Synapttek's growth and bright future. It embodies the sense of emergence as we win prime contracts and enter a different phase in our development as a company. The word *vibrant* alludes to the faster pace of proposals, as we have daily task order response requirements on our IDIQ contracts. *Vibrant* also describes the energy and enthusiasm of the employees that we are recruiting to support these new tasks across the country.

Our vigorous approach to the challenges that are inherent to the growth we are experiencing as a company can also be described as *vibrant*. We have a management team that is committed to our employees and our customers. Synapttek is a collaborative environment, where we collectively work to find the best approach to issues and then work together to implement those solutions. Our Quality Management System requires us to regularly solicit feedback from our customers and we are often singled out as being instrumental in exceeding goals and expectations. It is the commitment of each of our employees to the customer's mission that makes us *vibrant*. We need to continue to cultivate our culture as we grow and add new members to the Synapttek family.

We are poised and ready to take on new challenges. We credit much of our success to the suggestions and feedback we receive from our employees. Many of our best practices have come from the constructive inputs we have received via our ISO@synapttekcorp.com inbox. I encourage you to continue to bring ideas forward through the ISO inbox, your manager, or directly to me. We want Synapttek to be as *vibrant* as it can be, I look forward to working with all of you to promote our vivid culture.

David Gauldfeldt

Kudos

Leon Faircloth, ETM - awesome job of installing, tracing, finding the correct VLAN mapping the ports and printer and bringing everything together in a short period of time.

If you have someone you would like to thank or recognize, email your message to news@synapttekcorp.com

Password Reset Procedure Change

There is a new, simple way to change your Outlook password in the Cloud.

1. Using Internet Explorer, navigate to <https://portal.office.com>.
2. Login with your current credentials.
3. In the top right-hand corner of the browser select the rectangle featuring your name and picture.

4. Click "View account."

5. Under the security & privacy rectangle select, "Manage security & privacy."

6. Password.

Notes: Passwords must be 8 characters long, contain one uppercase letter, one lower case letter, one number, and one special character. The VPN Client is no longer working.
