The NOAALink Program is an innovative approach to NOAA’s enterprise-wide strategic Information Technology (IT) planning and management. Launched in 2008, NOAALink is a $2.5 billion IDIQ contract vehicle for procurement of IT products and services for the National Oceanic and Atmospheric Administration (NOAA), the Department of Commerce, and its other bureaus. The contract is designed to achieve the NOAA Office of the Chief Information Officer (OCIO) transformation to a new operating model, the cornerstone of which is the delivery of shared enterprise information services with enterprise service delivery as the core concept. To this end, TekSynap and our teammates will provide services and solutions in the four NOAALink CORE IT Service areas, which are comprised of:

- Customer Care
- Business Management
- Infrastructure Management
- Information Security and Risk Management

Through the NOAALink program, NOAA and the Department of Commerce leverage technology advancements, including cloud computing, mobile devices, big data, and grid computing and meet the expectations of today’s workforce by providing information devices and services that are highly interactive and promote information sharing, collaboration, and innovation.

ABOUT TEAM TEKSYNAP

Team TekSynap is comprised of outstanding small businesses including Veterans Engineering & Professional Services (VEPS), Cambridge Connections, Diligent, FedData, SONA Networks, SSSI, and Technica, as well as large businesses AECOM (one of the largest professional engineering and information technology companies in the world) and Cisco Systems, to ensure the best possible support for the scientific and worldwide nature of NOAA’s mission. Team TekSynap’s large business key teaming partner is AECOM, with a staff of nearly 100,000 professionals, and gross revenues of nearly $20 billion in FY 2014. AECOM has operations throughout the United States and in over 150 countries and is a premier, fully integrated infrastructure and support services firm that works with virtually every federal agency. AECOM’s depth and breadth of capabilities, services, and people will support our solutions, staffing, and capabilities for achieving TO requirements and success. Team TekSynap’s small business key teaming partner, VEPS, was formed with the objective of bringing Veterans into the work force to produce the highest quality, most effective results for each of their clients. We will use VEPS’ to support select requirements within Information Security and Risk Management, IT Infrastructure, and Customer Care including help desk services and unified communications design, implementation, service, and support. VEPS actively supports NOAA on a cyber security program by reporting incident events in real time supporting e-discovery, criminal, and HR investigations.
